Flagship Ecosystem**

04

Economic Model

BOT Chain

More than just a chain.

BOT Chain is the foundational infrastructure
for the AI and computing era.

The Five Core Infrastructures of BOT Chain

01

Mainnet

The core public blockchain network powering ecosystem operations and on-chain value flow.

02

Explorer

Real-time access to on-chain data, hashrate verification, and transaction records for enhanced transparency.

03

Bridge

Cross-chain infrastructure connecting assets and liquidity across multiple ecosystems.

04

BO Wallet

A unified gateway for participation, staking, rewards, and real-world computing returns.

05

BDEX

A decentralized trading environment enabling seamless on-chain asset exchange and liquidity coordination.

Technology Highlights

01

Native AI Agent Identity

Enabling AI Agents with native on-chain identities for autonomous interaction and collaboration.

02

Decentralized Computing Marketplace

A unified network for computing power access, scheduling, verification, and monetization.

03

Multi-Dimensional On-Chain Identity System

Building clear identity structures for users, nodes, protocols, and AI Agents across the ecosystem.

04

One-Click Protocol Deployment / PaaS

Modular protocol infrastructure that allows projects to launch faster without rebuilding core systems.

Modular Algorithm Architecture × AI-Native Capability ×
Computing Power Financialization
BOT Chain is building the foundational operating network for the AI era.

BOT Chain Capital Consensus

\$15 Million Seed Round
Successfully Completed

Core Investment Institutions

NIX
Foundation

NIX Foundation:
Sweden-based national technology
foundation

ALPHA
CAPITAL

Alpha Capital:
One of the leading venture capital
firms in Türkiye

Gemhead
Capital

Gemhead Capital:
Binance Alpha core investment institution

\$50,000,000

Strategic Capital Injection. Strong institutional backing
accelerating BOT Chain's long-term expansion in the
public blockchain sector.

**Planned Exchange Listings Starting
September**

OKX · Bybit · KuCoin · MEXC · Bitget · and other
leading global exchanges

BOT Global Consensus Network

Global Ecosystem Expansion

55+ Countries & Regions

350,000+ Global Users

15 Major Language Systems Supported

Asia:

China · South Korea · Japan · Vietnam · Taiwan · Singapore · Malaysia · Thailand · Indonesia · India · Philippines · Cambodia · Laos · Bangladesh

North America:

United States · Canada · Mexico

South America:

Brazil · Argentina · Chile · Colombia · Peru

Europe:

Spain · Portugal · Germany · France · United Kingdom · Sweden · Switzerland · Italy · Netherlands · Belgium · Austria · Poland · Czech Republic

Africa:

Nigeria · Kenya · South Africa · Morocco · Ghana

Middle East:

United Arab Emirates · Saudi Arabia · Türkiye

BOT Global Office Network

Global Operational Structure

1,300 Studios + **200** Operation Centers

Total Global Presence:
1,500 Offices Worldwide

BOT Chain Global Consensus Summit · Hong Kong

Representatives from 45 Countries & Regions. 4,000+ Attendees Gathered On Site
Political and business leaders came together alongside 20+ top-tier speakers and guests,
with global livestream views surpassing 200,000+.

CaryPact

Decentralized Supercomputing Protocol

The first flagship ecosystem launched on BOT Chain and one of the ecosystem's strongest traffic gateways.

Built to support large-scale global user growth and ecosystem conversion.

CaryPact Economic Model (CA)

◆ Total Supply **210 Million** ◆

Allocation

10 Million: SWAP

200 Million:
Computing Network
Emissions

Emission

Daily Emission:
40,000 CA

Emission
Reduction:
10% Every 2
Years

Full Emission
Cycle: 22
Years

Dual Passive Turbo Model — Computing Power Driven

Participation Mechanism: 1U = 1 Hashrate Unit. Minimum Entry: 100U

Passive Computing
Power Mining:

$$16,800 \text{ CA} \times \frac{\text{Personal Hashrate}}{\text{Total Network Hashrate}} = \text{Personal Daily Output} \quad (\text{Permanent Participation, No Exit Mechanism})$$

Hashrate
Compensation:

$$1 \times K^{n-1} \quad (K \approx 1.01, n = \text{Days Since Launch})$$

CA Sell Slippage
Fee 5%

1.8% Buyback

3.2% Node

Dual Passive Turbo Model — Staking Driven

 Staking Periods (Token-Based)	Flexible	30 Days	90 Days	180 Days	360 Days
	Daily Yield Rate 0.2%—0.4%	Flexible × 1.3	Flexible × 1.6	Flexible × 2	Flexible × 2.5

Rules	Automatic Daily Compounding	Flexible Staking Period Options (T+1 Settlement)
-------	-----------------------------	--

Example: Staking CA Worth 10,000U

Flexible

Daily Yield Rate

0.2% – 0.4%

Token Growth Multiple

Approx. 3x

Estimated Total Asset Value

≈ \$80428

30 Days

Daily Yield Rate

Flexible × 1.3

Token Growth Multiple

Approx. 4x

Estimated Total Asset Value

≈ \$111079

90 Days

Daily Yield Rate

Flexible × 1.6

Token Growth Multiple

Approx. 5.6x

Estimated Total Asset Value

≈ \$153368

180 天

Daily Yield Rate

Flexible × 2

Token Growth Multiple

Approx. 8.6x

Estimated Total Asset Value

≈ \$235691

360 Days

Daily Yield Rate

Flexible × 2.5

Token Growth Multiple

Approx. 14.7x

Estimated Total Asset Value

≈ \$402987

Conclusion: The longer the staking period, **the stronger the compounding effect.**

Reference Assumptions: CA Price: 30U / Flexible Daily Yield: 0.3% / Average Daily Price Growth: 0.3%

Three Active Incentive Mechanisms Powering Strong CA Consensus

(Active Reward Pool: $40,000 \times 35\% = 14,000$ CA / Day)

Active Hashrate Output
(7,000 CA / Day)

Active Pool 50%
(7,000 CA / Day)

$$\times \frac{\text{Personal Small Leg Hashrate}}{\text{Total Network Small Leg Hashrate}} = \text{Personal Reward}$$

Requirements:
Personal Investment: 300 USDT
Leg Performance $\geq 3,000$ U

VIP Level Rewards

(7,000 CA / Day
Distributed by
Personal Weight)

Level	V1	V2	V3	V4	V5	V6	V7	V8	V9	V10
Personal Performance	500U	1K U	1.5K U	2K U	3K U	4K U	5K U	10K U	15K U	20K U
Leg Effective Performance	10K U	30K U	80K U	200K U	500K U	1.6M U	5M U	2×V7	2×V8	2×V9
VIP Base Weight	1	2.2	4.8	10.6	23	51	~113	~170	~255	~383

Staking VIP Level Rewards (6% — 30%)

PoS
Staking /
Active
Rewards

6%	10%	13%	16%	19%	22%	24%	26%	28%	30%
----	-----	-----	-----	-----	-----	-----	-----	-----	-----

★ **Effective Performance Formula:** Leg Effective Performance = Total USDT from Downline Mining Power Purchases + Real-Time USDT Value of Leg CA Staking

VIP Rewards Distribution Rules

1、Personal Weight = Base Level Weight × Time Bonus
(Approximately Equal to 1.006^N)

2、VIP Level Rewards = Personal Weight ÷ Total VIP Weight Across the Network × 7,000 CA

3、V7—V10 additionally receive 3% DAO Rewards

The Growth Logic Behind CA & BOT

CA — Computing Power Asset / BOT — Digital Energy of the Network

- 
- 1.10% Buyback & Permanent Burn Deflation
 - 2. Fixed Daily Emission with 10% Reduction Every 2 Years
 - 3. Staking Mechanism Reduces Circulating Supply
 - **4. Private Traffic Growth Through Community Consensus**
- 1.50% of Gas Fees Permanently Burned
 - 2. Strong Supply Control Mechanism — Fully Released Over 25 Years
 - 3. Ecosystem Applications Continuously Build Liquidity Pools
 - **4. Public Traffic Expansion Through KOLs & Mainstream Media Exposure**

Core Competitive Moats

Six Core Strategic Moats Powering Long-Term Sustainable Growth

01

Public Chain + Ecosystem Synergy

Combining foundational blockchain infrastructure with diversified ecosystem applications to create a powerful

02

Global Community Consensus Network

Building a distributed global community system with strong user engagement and scalable market-driven expansion.

03

Innovative Economic Model

A sustainable token incentive structure balancing long-term value growth with ecosystem liquidity and participation.

04

Systemized Organizational Capability

Standardized operational structures and execution systems enabling efficient collaboration and scalable global expansion.

05

International Leadership & Strategic IP Empowerment

Backed by experienced global leaders, strategic resources, and international market vision to strengthen ecosystem growth.

06

Global Education Infrastructure

A comprehensive education and empowerment system designed to continuously elevate user understanding and ecosystem participation.

Conclusion

01

Long-Term
Ecosystem Vision

02

Exponential Growth
Potential

03

A Truly Global Mega
Project

04

Capturing the Computing
Wealth Opportunity of the
Public Chain 4.0 Era

SLOGAN

Public Chains Empower Ecosystems. Ecosystems Generate Traffic. Traffic Fuels the Public Chain.

The Flywheel Effect Drives Simultaneous Ecosystem Growth and Value Expansion.
